THE OYEN NEWS

### The Late Mrs. Lynett

By the death of Mary Bolger, relict of the late John Lynett, which occurred on Sunday morning, one of Arthur's most highly esteemed and generally beloved ladies was removed. For some time Mrs. Lynett had not enjoyed good health and on the Monday previous to her death, she underwent a critical operation from which for a few days she rallied satisfactorily. The news of her demise cast a gloom over the community and occasioned many expressions of regret.

Her funeral takes place this Thursday afternoon at St. John's Church. Interment will take place in the Arthur R. C. Cemetery.

Mrs. Lynett was a daughter of the late Mr. and Mrs. Martin Bolger and was born in Windybank Township. In this vicinity her entire life was spent. She was a woman of fine Christian character, deeply devoted to her home and family. She was an excellent neighbor, with pronounced charitable inclinations and thoughtfulness for others. She was a devoted member of the Roman Catholic Church and had the joy of having one of her sons dedicated to its priesthood.

Her husband predeceased her almost eighteen years ago.

She leaves to mourn the loss of a devoted mother, a family of six sons and one daughter, Charles of Arthur, Russell of Antigo, Wis., Rev. Father Cyril Lynett of Oyen, Alta., William of Walkerton, Frank of Antigo, Bert at home, and Kathleen of the Toronto teaching staff. She is also survived by one sister, Mrs. Frank Kelly of San Francisco.

—Enterprise News, Arthur, Ont., February 2, 1933.

### Impressive Service

for Arthur E. Johnson  
is Widely Attended

The funeral of the late Arthur E. Johnson, whose death occurred at Cereal on Tuesday, January 31, 1933, was conducted in Oyen United Church, on Friday afternoon, February 3, and interment followed at Oyen cemetery, Rev. E. F. Kemp, of Oyen, who conducted the service at the church, was assisted at the graveside by Rev. J. D. Wollatt of Cereal, and Mr. A. V. Boudine of Chinook, who offered a farewell prayer.

About an hour before the time appointed for the service, the church was filled to capacity with those who had come to pay their last respects to an honored citizen and departed friend. Those who came later and were unable to find a place in the church auditorium, took refuge from the cold wind in the church basement, which in time was also filled to capacity, others were compelled to remain in their cars. It is estimated over five hundred people attended the funeral.

Possibly at no time in the town's history, has the community been so deeply stirred over the death of one of its citizens. The large congregation assembled, and profusion of floral offerings banked about the casket, made fitting testimony of the esteem in which the deceased was held.

After delivering a beautiful message of comfort to the bereaved family, Rev. Kemp paid a glowing tribute to the sterling qualities of the deceased. Mr. Johnson was a good citizen, a staunch supporter of his church, took a keen interest in all community enterprises and was a loving husband and father. A special selection, "God Will Take Care of You," was sung by the choir.

Floral offerings were received from the following: Mrs. A. E. Johnson and family, Mr. and Mrs. C. E. Johnson and family, Mrs. Morrell, Frank and Jane, Mr. and Mrs. W. D. Morrell; Mr. and Mrs. J. Morrell; Oyen United Church Board; Oyen District Builders; Oyen Board of Trade; Oyen Curling Club; Oyen U.F.A. Local No. 60; Manager and staff L.H.C.; People's Meat Market; B. C. Cafe; Mr. and Mrs. James Lees and family; Mr. and Mrs. J. J. Purcell and family; Mr. H. J. Desmond and family; Mr. and Mrs. C. S. Wright and family; Mr. and Mrs. W. V. Miller and family; Mr. J. J. Kelly; Mr. F. C. Bliss; Mr. and Mrs. Elmer McArthur; James and Margaret Stewart; Sibbald; Bishop Brothers and families; Dr. and Mrs. W. D. McPhail and Jean, Kin-Constable and Mrs. Green; Mrs. J. Love and family; Mr. and Mrs. J. P. Rorabeck; Mr. and Mrs. H. R. Chapin, Franciscan, Man; Mr. and Mrs. J. Long; Mr. and Mrs. E. H. Christiansen; Mr. and Mrs. Eric Berg; Mr. and Mrs. Chas. L. Dunford; Mr. Reg. Judson; Mr. and Mrs. S. A. Miller; Mr. and Mrs. R. J. Scott; Mr. and Mrs. R. E. Gillespie and Louis; Mr. George McNell; Mr. and Mrs. R. Burns; Mr. and Mrs. H. Manroe; Captain Friends; W. McNelly, Robert Brothers, Rothwell Brothers, Anderson Brothers, Walter Sampson, Otto Hargens, R. McMullan, R. M. Taylor, F. J. Logan, W. Yake and R. E. Hustone; Mr. and Mrs. Charles Stewart; Beth and Jack; Albert Oyen and Jenn Hogan; Mr. and Mrs. M. G. Whitlock and family; Dr.

(Concluded on page 2.)

### Local Domestic Freight Rates from Prairies to Coast May be Reduced

According to a report reaching here from Ottawa, a reduction of the freight rate on low grade grains from the prairie provinces to the coast, is being sought. A reduction of 50 per cent of the difference between the present rate on export grain and that of domestic, is aimed at, and it is believed the rate will shortly become effective. The News is informed that Mr. F. G. Langford, a former resident of this district, but now of the F. G. Langford Co., Ltd., of Chilliwack, B. C., has been working for some months to secure a reduction of the rate on lower grade grains, and it is believed that his efforts will shortly bear fruit.

Interviewed by the News, Mr. Langford pointed out that the new rate, when in effect will be of great benefit to B. C. farmers.

### Dr. W. D. McPhail Injured

When Kitchen Range Explodes

Dr. W. D. McPhail of Kinderley, a former resident of Oyen, sustained a broken ankle and cuts on one leg, when the kitchen range in his home exploded. The force of the explosion, wrecked the range and drove pieces of iron into the walls of the kitchen and removed large patches of plaster, as well as bursting water pipes. Mr. McPhail just happened to enter the kitchen when the explosion took place (he had put coal on the fire less than fifteen minutes before) and was blown through a doorway into the dining room of his home, sustaining injuries as stated. No one else in the house was injured.

His many friends in this district will be glad to learn that he is getting on all right after his trying experience, and is able to get about with the aid

### Entertainment Pleases Audience

The entertainment sponsored by the Sunday school of Oyen United Church, and presented in the church basement on Friday evening, February 10, was well attended and proved an unqualified success.

The program opened with the singing of O Canada. This was followed by a monologue by Miss Alberta Wenger, "Don't Come To Late." The C. O. T. furnished the next number in the form of a pantomime of Comic Strip Characters followed by songs and a jazz band. The next number was a sketch "A Pair of Lunatics" presented by Rev. E. F. Kemp and Miss Alberta Wenger. Then four selections by the choir accompanied by Mr. F. E. Neid on the banjo. A monologue by Miss June Walker, "The Substitute Parson." A one act sketch entitled "The Door Departed" in which the following took part: Rev. and Mrs. E. F. Kemp, Mrs. J. P. Rorabeck, Mr. R. J. Scott, Mr. Louis Gillespie and Miss Margaret Bradford. The program was closed with the singing of the National Anthem. Mr. W. T. A. Walker, superintendent of the Sunday School, acted as chairman.

After the entertainment a pleasant hour was spent at a cafeteria supper. The total proceeds amounted to \$28.75.

In commenting on the entertainment, it would possibly be unfair to single out anyone for special praise. Everyone taking part assisted materially in the success of a very pleasing program.

The talent brought to light through this entertainment should make future programs of a similar nature easy to arrange.

of crutches. The accident occurred the fore part of last week, and is believed to have been caused by explosive in the coal.

### Tabulating The Census.

In this machine age, and during a period of unemployment on a scale never before experienced in this country, it is tempting to give the chief blame for the prevailing unemployment to one factor—the machine. It is being argued that man through its great inventive genius has succeeded so well that he is putting himself out of work; that the machine is now doing what man himself ought to do. It cannot be denied that the machine has displayed man-power in many directions and ways. But, conversely, it cannot be denied that the machine has developed so many new things and made them accessible to millions of the people who would otherwise be denied them that, in other directions and ways, the machine has created employment for man. Many examples of this might be given.

Aside from this, however, there is another fact that is too often overlooked, and that is, hundreds of jobs are now being made and done by machinery which would never be done at all if we had to depend upon man-power to do them. They would be economically impossible, and but for the machine, man would simply be denied these things which the machines now do or provide for him. In each instance the machine is not depriving man of employment, but is merely adding to the sum total of the world's goods, services, conveniences, even knowledge.

Let us devote this article to a concrete illustration of this fact, gleaned from a most interesting newspaper article. Can you imagine a machine that counts 240 separate facts at the same time? Can you imagine another that detects man-made mistakes? Yet the inventive genius of a Canadian has evolved such machines which are now at work in the Census Bureau at Ottawa, machines which do anything in the world. They are not replacing men and women, because as many, or more, persons are employed in the Census Bureau as in former years, but they are making thousands of calculations now possible which otherwise would never be made.

The 1931 census of Canada now being tabulated is the biggest job of its kind ever undertaken in this country. Were it not for the two machines referred to it would cost three times as much as it will to tabulate the information which will be published, and it would, therefore, never be undertaken. In addition, much more information will be compiled than has been published, but it will be available if and when required.

The two machines are the verifier and the tabulator. The first detects errors and the second counts 240 different facts from individual cards at the rate of 240 cards a minute.

The data taken by census enumerators is transferred to small cards by punching holes for each fact recorded. A hole is punched in the proper place to indicate the sex, age, religion, nationality, language, racial origin, and other things of the persons being counted. A straight run of three years on the cards is checked for possible errors. The machine throws out cards on which conflicting pieces of information are recorded. For instance, if a person's age is 25 and he is listed as a new voter, under 21, the cards is thrown into the discard by the machine and sent back for checking to correct the discrepancy.

If a man gives his racial origin as Jewish and his religion as Baptist the card is thrown out and re-checked. If the sex is omitted the card is shot back. The machine, therefore, cannot detect a straight run in a single fact, such as the wrong age, or the wrong sex, but it can and does detect all discrepancies of conflicting data.

The tabulator is the only machine in the world which can count 240 separate facts at the same time, and, as already stated, it does it at the rate of 240 cards a minute.

Just how these two uncanny, almost human, machines do their work will not permit of a description, intimately related as it would be. They were invented by A. E. Thornton, mechanical superintendent of the Dominion Bureau of Statistics, and were built in Ottawa under his direction and that of his assistant, J. Bellisle. These two men worked for three years on their plans. They had some little difficulty persuading the Government to allow them to build the machines as commercial manufacturers and said they would never work. The machines have been working for 15 months without a hitch.

The next largest machine in the world is at Washington and is used by the United States Census Bureau. It, however, tabulates only 60 facts at a time compared with the 240 facts tabulated by the Canadian machine. The largest commercial machine in the world tabulates only 36 facts and cannot be bought. It can only be rented. Before the next U.S. census is taken, Mr. Thornton's machine will likely be in operation at Washington, Canada is miles ahead of the United States in this respect.

Development of the machine was an exemplification of the theory of necessity being the mother of invention. Had Mr. Thornton and Mr. Bellisle not set to work in their little machine shop it would most likely never have been invented. Private concerns could scarcely devote time and expense because there is little market. The machine is of use only for census purposes and the Dominion Bureau of Statistics is the only one in the world.

But to emphasize the idea mentioned at the outset of this article. Let it be repeated that these machines are not throwing people out of jobs. The tabulation of the present census will cost less than previous ones and many more people are employed. What the machine does is enable the Bureau to do more work with less man-power. It does not take the place of man before, and without the machines, never would be tabulated. So much information is being gathered and so many new things are being published the volumes would fill the Parliament buildings of the Canadian and the printing costs would approach the operating costs of the Ottawa National Highway. By careful selection of the information which will be published, what figures will be of greater use to the people of Canada as a whole. But the whole picture will be better, and they have proved of wonderful help to me.

Take new strong and well again, but am never without a box in the house.

### Her Heart Was Weak Nervous Shaky, Nights Restless

Mrs. A. Black, Wallingboro, Ont., writes: "I suffered from weak nervous, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have such faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am never without a box in the house.

### New Tire Guarantee Announced

New Warranty Hoped To Result In More Satisfactory Service

Much of the confusion incidental to the adjustment claims will be eliminated by a new guarantee announced by all standard-size tire manufacturers. The companies believe that no longer will car owners find themselves in dispute with dealers or manufacturers as to the validity of their claims.

The new guarantee, planned to remove all contentious possibilities, warrants tires used in private passenger cars for 9 months or 12 months, depending on the type of tire, and a guarantee certificate accompanies each tire.

All road hazards, excepting punctures and running flat, are covered by the new guarantee and provision is made for a satisfactory repair or a pro rata adjustment based on the term of the guarantee. It will be seen that under this new warranty, no claim will be made for such injuries as stone-bruises, cuts, wheels out of line, faulty-brakes, etc., not previously covered by tire guarantee. This is a new and definite advantage to the tire user.

Dealers are now selling tires under the new guarantee and motorists are being issued the certificate which is obtained with each new tire. The new guarantee covers, also, tires sold as equipment on new passenger cars to be used in private passenger service.

Leading tire manufacturers believe the new warranty will result in more satisfactory automobile service, through the elimination of disputes and the broadened coverage of the warranty.

### Special Garnet Grades Asked

Committee Would Like Legislation To Become Effective In 1934

Three special grades of garnet for use in the construction of the Western Grain Standards committee are accepted by the Federal Government. S. S. Smith, assistant grain commissioner for Saskatchewan, announced on his return to Saskatoon from a meeting of the committee at Winnipeg. The committee will ask the Government to pass the necessary legislation, an amendment to the Grain Act, at the coming session, but advises that the amendment should not become effective before the arrival of the 1934 crop.

The committee would, however, leave it to the Board of Grain Commissioners to bring the new grades, known as No. 2 W. C. W. Garnet, No. 3 W. C. W. Garnet, and No. 3 C. W. Garnet into effect any time prior to the harvesting of the 1934 crop if deemed desirable.

It was pointed out by Mr. Dundas, added, that the possible large carry-over at the end of the 1933 crop would contain a large proportion of grain which produced a low grade, as qualified as No. 2 Northern if the new grading had come into effect. This influenced the committee in advising the Government that the new grades should be made immediately effective. Also the committee did not want to see the grading system at present for fear of adverse effect on the present low price of wheat.

### Not Enough To Go Round

Young Amateur Astronomer Builds "Stararium" In St. Louis

Reports received by A. A. MacMillan, Chief of the Sheep and Swine Division of the Department of Agriculture, show that Saskatchewan breeders, like hog breeders all over Canada, are particularly keen on getting pure bred breeding stock.

All the pure bred sows from the Industrial Farm at Moose Jaw were purchased under the account of the Federal Department of Agriculture under the Breed Stock Policy. And while this looked like a large order to dispose of, it was not so when it was found that the quality stock that it literally sold itself; and, as a matter of fact, it has been quite impossible to service the large number of enquiries for pure bred gilts which this sale attracted.

### Communities Object

The Keweenaw Club of Timmins, Ont., has undertaken a campaign to secure a day's pay from every employed person to assist them in need. According to the Progressive Advance, it is meeting with general success. But it is meeting with opposition from the Communist element which has issued a circular pointing abuses on those promoting the plan—Toronto Globe.

Building cement is sifted through such screens that it is possible to hold water in them.

According to the 1930 census South Carolina has the highest percentage of literacy.

### How Soviet Russia Trades

Demands Cash From Others But Unlimited Credit For Itself

How the barter scheme which Soviet Russia would work out will very likely not be allowed to know, because the Canadian Government is asked to guarantee \$4,000,000. But in the case of a real trade agreement we get some idea. Italy has a trading pact drawn up in 1924, which expires next August, and the Italian Government has apparently had enough of it as notice is expected to be given within the next few weeks to terminate it. Yet only has the trade been very one-sided, but while the Soviet demands cash for Italian purchases, it demanded four years and four months credit for itself. Now the Soviet has put forward feelers for longer credit. That might be five years, seven, or how long will you give.

Much as nations want trade, five years or more of credit compared with cash "is a bit too thick"—St. Thomas Times-Journal.

### Canadian Seeds Exchanged

Canadian Wild Flower Seeds For Planting On War Graves In Europe

A report issued by the Division of Botany of the Dominion Experimental Farms Branch show that the annual exchange list of seeds, collected by the Dominion companies, 15,507 species, and a total of 4,802 packets of seeds, 159 rooted plants and 11 cuttings were sent out to 110 hospitals, convalescent homes, institutions, throughout the world. In return, 21,171 packets of seeds and 21 cuttings were received from foreign hospitals. The seeds were obtained, as required, for scientific workers in Canada. Twenty-eight packets of seed of Canadian wild flowers were sent to the War Graves Committee for planting on the battlefields of Europe. Other activities included studies of the life history of noxious weeds, and of chemical methods of eradication.

### Studio At Coast

British Films To Be Produced In British Columbia

A studio for production of British moving pictures will be established in British Columbia, it was announced by Mr. C. J. O'Brien, former British army officer who has superintended construction of large studios in Hollywood. The announcement was made at the incorporation of the British-American Film Company at Victoria.

The studios will be rented to various good producers who desire to continue in the British market under the Empire Quota laws. In addition the company will make at least eight productions of its own each year under the direction of Edward Carewe, who has been engaged by the company, Major Smith added.

The company will be under British control as the British quota and law specifies while the staff and actors will be 75 per cent. British.

### Shows Star Movements

Young Amateur Astronomer Builds "Stararium" In St. Louis

A miniature planetarium which is said to unfold the drama of the firmament in much the same manner as the United States planetarium in Chicago has been built at St. Louis, Montana, by Stuart O'Byrne, 27-year-old amateur astronomer.

O'Byrne calls his model a "stararium," since, he says, it shows only star movement, while a true planetarium, of which there are only two in the United States, will show the movements of the stars, planets, sun and moon in their proper position in relation to the time of year and the latitude from which observed.

It takes thirty-five men about three months to paint the dome of the planetarium, which is 100 feet in diameter. The stars and 4,000 points of paint are mixed for the task.

Over 55,000 pounds of herring scales have been sold by fishermen of New Brunswick to manufacturers of artificial baits.

# CHEST COLDS Best treated externally

## 2 WAYS at once!

When a cold goes down to the chest, take no chances. Go to bed and start Vicks double-action treatment.

Rob Vicks vigorously over throat and chest and cover with warm flannel. Relief is two-fold:

- (1) By stimulation—Through the skin like a plaster Vicks "draws out" tightness and soreness.
- (2) By inhalation—Its medicated vapors released by the heat of the body are inhaled direct to the air-passages. To increase the stimulative effect, cover the head with towel and chest with hot wet towels before applying Vicks.

**26 24**

**OVER 27 MILLION JARS USED YEARLY**

### Forage Crop Distribution

Fully Inaugurated Last Year Is To Be Continued

The forage crop distribution policy inaugurated last year by the federal minister of agriculture, the Honorable Robert Weir, is to be continued in 1933. This policy was designed to encourage and stimulate the production of seed grasses and clover in order that more food of good quality may be available for livestock and to develop permanency in agriculture, the areas where it is possible to do so.

There has been named a provincial committee to handle this work, composed of T. M. Stevenson, agriculturalist, forage crop laboratory, Saskatoon, who is responsible for supplying information on varieties, methods of growing and other technical data, S. H. Vigor, field crop commissioner, provincial department of agriculture, Regina, who is responsible for the selection of growers, and will, therefore, receive all applications from farmers wishing to participate in the distribution, and Nelson Young, district inspector, Dominion seed branch, Saskatoon, who will purchase and distribute the seed and also be responsible for the collection of same.

Selected lots of bromes, western sweet clover and alfalfa will be distributed. Any farmer may apply for one kind of seed grass or clover, where the maximum acreage is 25 per application. In the case of alfalfa, seed for 10 acres can be secured, and the same may be given application for alfalfa and another grass.

**Only One Answer**

Japan's Threat To Leave League Should Be Ignored

There is only one appropriate answer to Japan's threat to leave the League if the resolution censuring her proceeding in Manchuria is not withdrawn; and that is to ignore it entirely. Between a League of Nations which has brought the support of Japan by a simple acquiescence in her violence, and a League of Nations which is temporarily deprived of her support for refusing to do so, there cannot be a moment's hesitation.—London News-Chronicle.

**To Improve Wheat Prices**

**Best and Most Effective Way Is To Reduce Acreage**

We have led the world in wheat acreage following the disappearance of Russia and the Balkan countries from the rank of the exporters. There is every reason why we should now take the example of reducing acreage. All the world wheat conferences which could be held, all the legislation which could be sought, would not be so effective in the direction of improving wheat prices as this one step—Winnipeg Tribune.

**Continuation of the drought in the high-belt grazing regions is threatening South Africa's livestock this season.**

**The "tourist" industry has fallen to half million mark in France, as compared to 3,000,000 foreign tourists a year before the World War.**

# Great Drive Of Reindeer From Alaska To Canada To End Early This Spring

In March or April of this year the great drive of reindeer from Alaska to Canada's North West Territories is expected to be completed with the placing of the herd in the winter grazing range to the east of the delta of the Mackenzie River and the work of building up a new source of supply of food and clothing for the Dominion's northern natives will be begun. Department of the Interior representatives will take delivery of the herd from the men who have conducted the movement across the thousands of miles of Arctic terrain.

The most recent advice of the herd was contained in a wireless report received by the Dominion Lands Administration of the Department of the Interior to the effect that the reindeer station had been sent out on November 22 for the purpose of getting in touch with the drive and to accompany it in the crossing of the Mackenzie. On December 4 they had effected the "contact" and joined those in charge of the movement.

Preparations for the crossing of the herd were completed early this winter and the stations on both the summer grazing grounds along the coast near Kitiktootuk and at the mouth of the Mackenzie and on the winter range which lies inland along the east bank of the Mackenzie River are ready for the arrival of the reindeer. Mr. A. E. Porritt, of the Dominion Lands Administration of the Department of the Interior, is in charge of the reindeer camps, and his staff includes three Lapp families.

The winter station is the larger of the two and in many ways the more important as the herd will be a greater part of the year on the grazing grounds in its vicinity than on the summer station. The buildings are erected on a fairly level plain about one-quarter of a mile wide and along the Caribou River rise to an elevation of about 500 feet. The plain was at one time mostly covered by the forest was destroyed by fire about half a century ago and the new growth consists of spruce, spruce and aspen. On a high plateau to the east of the station there are no trees but it carries a splendid cover of reindeer moss. This area and that adjoining the upper Eskimo lake to the north and east constitute the principal winter range. This station is about fifty miles by winter trail from Adavik, and seventy miles by water, while the distance between the winter and summer camps is sixty miles by winter trail and seventy miles by water trail. The buildings at the winter station include a frame house which is occupied by the reindeer in charge; three log cabins for herders; a log building as additional sleeping quarters; two warehouses; and a workshop. The station is also equipped with a power boat for patrolling during open navigation.

The summer station near Kitiktootuk has four buildings, one of which is a frame dwelling and the other three are of log construction. One mile to the north is the Mackenzie, the largest unit of which is 450 feet in diameter. The more northerly grazing area, which is located along the coast to avoid the fly pests of the summer, is well watered and the combined ranges is considered very satisfactory for the first stage of the work of introducing reindeer into the Canadian North.

## Settlers Working Out Grate

Many Taking Up Northern Land On Relief

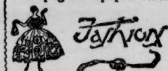

Ninety-two per cent. of the new settlers in the north, who took up land under the \$300 and \$500 government settlement scheme last year are on relief now. Arthur Kendall, chief executive officer of the provincial relief commission stated.

These settlers are working out their relief grants, Mr. Kendall said, by clearing out brush along proposed road routes, and the general work of pushing roads through the north will be continued this year. This project will provide roads that might otherwise not be started for some time to come.

Mr. Kendall also stated that the situation here as far as single destitute men are concerned here is quite stark in the circumstances. He declared at present there are only about a dozen men living at the immigration hall in Prince Albert.

The situation with respect to caring for the single destitute in the province, is generally satisfactory, Mr. Kendall stated. There are cases where men who had been on agricultural work cannot be dealt with except at concentration camps, but they are few in comparison to those taken care of in useful occupations.

## A PARTICULARLY SLENDERIZING MODEL GRACIOUS AND LOVELY IN EVERY DETAIL

This charming model favours black rough crepe silk, topped by pale grey crepe, so smart just now.

It has a neat, narrow collar, which is exceedingly becoming, besides detracting from the bodice breadth.

The sleeves have conservative puffs, and are snugly fitted below the elbow.

This easily made model is very luxuriously lovely carried out in crinoid crepe, silk, black, being still popular, or purple, wine-red, and the sleeves.

Style No. 209 is designed for sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46 inches bust.

Size 36 requires 21 yds. yards 39-inch with 1 1/2 yds. 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## Englishmen Recent Contention Of Judge

Believe Themselves As Competent As Men On Difficult Jury Cases

Lord Justice Thomas Edward Scrutton, 70 years old, and one of his British majesty's lords of appeal in London, England, started a fierce controversy in Alberta when he answered this question in the negative in the course of a judgment.

Diminishing the appeals of six men against the findings of a lower court, in which the plaintiff's company had been awarded damages totalling two and a quarter million dollars, his lordship praised the jury for their handling of the evidence in a tangled case lasting in all 34 days.

He then made the remark which has set Englishmen by the ears.

"There was no woman on the jury," Justice Scrutton said, adding, "and that is an advantage, where heavy business transactions have to be considered. The documents this jury of men asked for were very material documents, and the jury showed very great intelligence in grasping the business problems presented to them."

Leading feminists immediately attacked this remark tooth and nail, declaring that as long as Englishwomen have been given the right to sit on juries, they should be considered competent enough to hear any case, however difficult.

Against this contention prominent lawyers have stated it is better that all-male juries should hear cases in which everyday business is involved, pointing out that men are quicker at grasping business problems.

But the women have not had their last word yet, and there are indications that a movement will be launched to enforce equal rights for jurywomen.

## Alberta Sugar Beet Crop

Sugar Produced Expected To Total 45,000,000 Pounds

The peak estimate of Alberta sugar beet crop for the past season, given by the Raymond sugar factory, shows that 150,000 tons of beets were harvested over the contracted acreage and the sugar run will total 45,000,000 pounds. The beet growers of southern Alberta this year passed the 10-ton per acre average for the total acreage under contract. In one district the average reached 15 tons, while some individual crops ran 15 to 20 tons. The season yielded the heaviest crop yet known in the province. With increased capacity reached last fall, the factory at Raymond produced 150,000 tons of sugar this season, or about five times the amount turned out in 1925.

## Bargain For Some One

Walter Lord, 36, Winnipeg fireman, seeks to end his personal depression by getting married. Any woman who will pay his \$800 hospital bill, provide him with a good home and pay for a full course of guitar lessons can have him for husband, he has announced.

Knocked down by a locomotive, G. A. Palmer, 43, of Brighton, England, lived for two days with a broken spine.

## Shoots Elk In Alberta

Veteran Sportsman Proudly Displays Big Handsome Set Of Antlers

One of the first hunters to bring down an elk in northern Alberta since the ban on shooting of these animals was removed in certain parts of the province, George Fink, an sportsman of Falmouth, is proudly displaying a handsome 13-point set of antlers.

The animal was shot by Mr. Fink in the Brazeau district about 70 miles northeast of Edmonton, where the Brazeau River joins the Saskatchewan.

The particular elk that fell to Mr. Fink was one of three feeding at a rancher's haystack close to the Saskatchewan River.

The antlers measure 56 inches from tip to tip and an equal distance from the base of the head to the tip of the longest antler. This is a fairly large set, according to Mr. Fink.

Some years ago Mr. Fink shot a deer that veteran hunters declared was the third largest ever shot in the province.

On another occasion he aroused much interest by shooting an albino woodcock.

Elk are extremely plentiful in the Brazeau district the hunter states.

## Proud Of Health Record

Communicable Diseases In Alberta

General health conditions in Alberta during the past year were the best on record, so far as communicable diseases were concerned. The provincial department of health sums up the year as in this respect remarkably good, establishing a new high mark for freedom from such ailments.

Notwithstanding economic conditions, which might naturally be expected to aggravate ill-health, there was a marked improvement in 1926 over any previous year.

The death rate for the year fell somewhat below that of the previous year, which was 7.3 deaths per 1,000 population. Infant mortality in 1926 made a considerable and highly satisfactory drop, being only 58 deaths per 1,000 live births, as against 67 the year before.

Other figures that, along with the death rate of infants, are regarded as particularly significant of the general health situation, are those showing the maternal mortality rate. This was 3.8 per 1,000 living births, the lowest since the department has been keeping records.

## How To Make Time

People Who Do Not Idle On Job Accomplish Much

People who get through an immense amount of work are always those who know their idling must not be allowed to put forth covetous hand and steal five minutes here and half an hour there. They can obtain a measure of successful results of application, as a good farmer can obtain the most from his land by a proper rotation of crops. It is often found that the busiest of those who can find time to do a kind act to a friend or neighbor, for they know how to fit in one thing with another, till they are actually said to be able to "make" time when wanted.

## SMILING STARS AT PREMIERE

# Marked Increase In The Number Of Inhabited Farms In Saskatchewan Is Noted

## A Fisherman's Paradise

New Map Of Port Of The Muskoka Lakes Region

Persons familiar with lakes Simcoe and Couchiching and the western portion of the Great Waterway will welcome the publication of the new Orillia map sheet by the Topographical Survey, Department of the Interior, Ottawa. This map adds to the Muskoka sheet which lies immediately north of it. These two maps, together with the Parry Sound and Byng Inlet sheets already published, and the Sundridge sheet which is expected at an early date, include a part of Ontario fished far and wide for the facilities which it offers for sport and recreation. These maps are produced in co-operation with and from joint surveys with the Department of Fisheries, Province of Ontario.

The Orillia sheet borders Georgian Bay, an arm of which extends into the lake and forms several excellent deep water harbours. These ports have railway connections with Toronto and Montreal, and there is a considerable freight movement to and from the upper lakes. The Trent Waterway has its northern terminus at Port Severn shown on the map. This waterway is approximately 250 miles in length extending from Georgian Bay to Trenton on the Bay of Quinte on Lake Ontario. It is a series of navigable lakes and rivers connected by short stretches of canal and provided with the necessary locks and dams to enable vessels to cross the watershed. It follows the old Indian route between Lakes Huron and Ontario.

The first white men to traverse it were Champlain and a few Indians, later returning from Georgian Bay in 1615, accompanied a large party of Huron Indians to Lake Ontario. The first white links were built by the Dominion Government and the waterway is operated by the Department of Railways and Canals without fee or toll. This route from Great Lakes to the other passes through some of the finest scenery in Ontario. The country is noted as a "fisherman's Paradise." It affords unexcelled opportunities for "boating," "bathing," "hunting," "swimming," "fishing," and "camping." The particularly beautiful surroundings. A few hours travel on standard equipped train or over the improved Provincial highway reaches many of its beauty spots while a day or two serves to penetrate the long, narrow, and winding fishing privileges are available to tourists. Excellent accommodation at perfectly appointed hostels, summer homes, camps, and cabins is available at reasonable rates. Lakes Simcoe and Couchiching, with their many beaches and Lake Muskoka, are the most popular islands for its summering places for the families of business and professional men from Ontario and adjacent provinces.

The particularly beautiful surroundings have led to the establishment of several sanitariums.

## One Of Perishable Foods

Eggs Should Be Kept In Clean Cool Place

Eggs belong to the same food class as meat or milk. They are almost as perishable. Just because they are enclosed in a hard shell, they get rougher treatment. The porous, dirt and fifth and mold and disease germs can pass through and spoil an egg. The water of the egg will evaporate through the shell almost as fast as if it were in an open pan.

Many a housewife allows eggs to grow stale on a warm partry shelf or to take in the odors of a foul larder and then blames the farmer or greener for selling bad eggs.

It costs almost as much to produce a bad egg as to produce a good egg. Most egg losses, are, actually, preventable.

## A Lucky Escape

One-night a man in a car was run down at the level crossing. Consequently the old signalman in charge had to appear in court. After a grueling cross-examination he was still unshaken. He said he never forgot the incident, but all is to be forgiven.

The following day the superintendent of the line called him into his office.

"You did wonderfully well yesterday, Tom," he said. "I was afraid at first that you might water."

"No," said the replied Tom, "as long as that lawyer didn't ask me whether my lantern was lit."

A marked increase in the number of inhabited farms is noted in Saskatchewan during the past five years was one of the trends brought to the attention of the conference of federal, provincial and university agricultural authorities in Saskatoon.

Between 1921 and 1926 figures submitted by H. V. Higor, field crops commissioner, showed the number of farms dropped from 118,000 to 116,500, but in 1931 the number had increased to 125,345. The increase was chiefly in the northeast of the province.

People go back to the farms in hard times, the speaker suggested. Much had been heard of the trek from the southwest of the province to the northern area, but in 1931 the southward trek of farmers from crop divisions from which the movement originated showed an increase in acreage. The movement north, however, had not been fully ascertained. A comment from a mortgage inspector that his company had no land out in "was" quoted.

A statement that the charts did not indicate any increase in the proportion of farms in the north, after five years brought the comment from J. G. Taggart, of the Swift Current Experimental farm that fallow was increased and the number of acres sold but not on the sandy soils.

Ranching had by no means disappeared from Saskatchewan. J. G. Robertson, livestock commissioner, noted. In 1932 the land under grazing lands amounted to 3,700,000 acres.

Charts of beef steer prices showed the peak price just year to come in May or June, but before the grass on the cattle came on the market. There was also usually a lower peak in January.

In regard to production, cattle had reached a peak in 1922, then fell and were now again increasing. Hogs made a very rapid increase in 1931. There were now raising. Horses reached maximum numbers in 1921, remained fairly steady until 1927 and had since decreased considerably.

Buttery production was higher in 1932 than ever before, the figures submitted by W. H. McAllister of the provincial poultry division showed. Turkey, after taking a big drop in production from 1923 to 1927, were again at a peak.

The Waterloo building of unnecessary materials was the weak point in the dairy industry as seen by P. E. Redman, dairy commissioner. Fifty thousand of the 125,000 farms of the province were now milking cows a year rounded off to 100,000. The value of the cow testing work. The cows under test were producing 291 pounds of milk a day. The province had 255 pounds in 1921. Even at the present low prices that meant an extra \$200,000 from the 4,000 cows under test.

## Better Grade Barley

Production Is Being Slowly Neglected By Canadian Farmers

Production of good barley is being sadly neglected by western Canadian farmers, particularly in Saskatchewan, although there is always a healthy domestic market for a malting barley, said George Bailey, of Winnipeg, manager of the Canada Malting Company.

The subject was discussed at Saskatoon between Mr. Bailey, J. A. Blair, manager of the Brierley Brewing Company, and G. M. (Monty) Black, president of Black and Armstrong, Winnipeg, and president of the Western Breweries Ltd.

"Why not have a reputation for good barley as well as for good wheat?" Mr. Bailey argues. About 20,000 bushels of barley were produced in Canada last year, but much of it was poor, good only for feed.

## Gliders Use Mountain Top

Flying from the top of Knocknaght Mountain, above Green Island, Ireland, has become a favorite sport of members of the Ulster Gliding and Aviation Club. On the mountain top is an extensive, but rough tract of waste land, and from this the gliders have started long flights. Attempts to break height and endurance flights are being made.

A stocking 80 feet long hung from the roof of Albert Hall, in London, England, during a Christmas sale.

Unemployment is small in Trinidad, and is expected to decrease shortly.

"Consequences!" he repeated. "Consequences for me? I warned you we shouldn't split our party. That was the cause of our falling. I predicted just what happened."

Haskell brushed the words aside. "The consequences of a blundering, botched-up patrol such as you led are usually demolition to the victor and what you'll have to take. In an important matter like this I haven't any choice but to make you a constable. Whipple, write out the papers for his demotion."

For moments Alan stared at him. Then he laughed. It was incredible, a travesty. Busted! Busted because of this man's orders. Busted because he had been sent out, tied hand and foot, on a patrol doomed to disaster before it started.

He snarled. "You can quit that scratching, Whipple. I'm not a constable yet. And you, inspector, if you haven't got sense enough to get my party, he'll either ask for your resignation or fan you down to the border where you belong. You're going to give Dave MacMillan a decent chance and I'm going to make that patrol to the Incomum."

Across the desk Haskell surveyed him coldly. "Just a moment, Bunker. You said something about my ordering you to split your party, you said you were going to resign or fan you down to the border where you belong. You're going to give Dave MacMillan a decent chance and I'm going to make that patrol to the Incomum."

"You didn't order me? To you say you didn't order me?"

"That's exactly what I said, sergeant. I gave you no such orders."

Speechless for moments, Alan dialy found words. "You're a constable! A sneaking liar! You're trying to crawl out..."

Haskell jerked around to Whipple. "Make a note of that remark," he turned to Alan again, and in hard tones, with no hesitation or weakness, he said: "You came in here thinking you had some heavy artillery against me. You meant to get me. Whether I gave orders or merely suggested, isn't the question now, sergeant. The question is: How are you going to handle this?"

going to prove your charge? Do you happen to possess any documentary evidence, or can you produce any witnesses that I gave you that order?" You can't! Hardstock and Younge were down at the wharf. On the other hand Constable Whipple here is present and heard what you said. So it is the word of two people against yours, and one of them your officer commanding. What do you think of your heavy artillery now?"

He smiled sardonically, in triumph. Alan stood mute, thunderstruck. A moment ago he had thought that Haskell had actually forgotten those crazy orders. But now, with the meaning of those words dawning upon him, he realized that Haskell had deliberately planned this ploy. By a brazen, incredibly brazen lie, he intended to squirm out of any and all responsibility for the wrecked patrol.

The very effrontery of the denial staggered Alan. In a dazed manner he sought to find a way out of what Haskell had just said. But after a little space it was borne in upon him that Haskell had beaten him; that he no longer held a sword over the inspector, that his own heavy weapon was turned against himself now. Whipple had been here; his own men had been down at the wharf. In presence Haskell he felt his situation like the fanged jaws of a trap pinning him.

He stood there speechless, staring into the cold taunting eyes of his enemy. Presently he was able to say, throatily: "I hadn't thought of that, inspector. I know you were right. But still I thought you were near being a man for a thing like that. I've been associating with men like Larry and Bill and Ted for so long that I'd forgotten your kind exists. As a lie, a damnable bare-faced lie, from an officer—in that uniform..."

"Yes, that all. You're got me," He turned and trudged out the door.

He snarled. "You can quit that scratching, Whipple. I'm not a constable yet. And you, inspector, if you haven't got sense enough to get my party, he'll either ask for your resignation or fan you down to the border where you belong. You're going to give Dave MacMillan a decent chance and I'm going to make that patrol to the Incomum."

Dave MacMillan, all aside from Dave being Joyce's father. If it had been his duty to arrest MacMillan and bring him in, it was a higher duty now to fight for him, to clear a man whom he knew in his heart to be innocent.

Thinking in hard practical terms, Alan saw that so long as Haskell had power over him, he could not stir a hand. If he was ever to get those criminals, he had to be free. Several paths lay open to him. One by one he studied and rejected them, till only the last remained.

For minutes he weighed that possible act. His coat he took was a terrible cost. It would wipe out his last reputation, his whole police record. It would kill his last chance of ever bringing Haskell to account. It would uproot him and take him for good and all out of this North country.

Turn by turn and indecision, he wavered. The price seemed too staggering. He called aloud: "Joyce! You wanted to see me?"

"Alan! I've been wondering where you are. Your cabin was all dark and I couldn't find you." To eager hope she asked him: "Alan, what did Haskell say about Dad? He's going to release Dad on bail, for as you thought?"

Alan shook his head, sorry for her, sorry for all the heartache that lay ahead of her and her father. He said: "It's a long time before I can be brutal and inhuman. He wouldn't consent even to letting your father remain here. He intends to send him outside to Edmonton."

It was on his lips to add, "Your father is being sacrificed to Haskell's need of a victim." But he could not bring himself to tell Joyce that. The news had stricken her cruelly enough. If only she could hear her father, if only she could visit him, the ordeal might be lightened for her. The lonely waiting weeks a suspension of agony, if her father was a thousand miles away, among strangers, with no one to lift a hand for her.

He offered gently: "Joyce, if you will go along and be near him, I'll pay—I'll see to it that you can visit him, and you, and for him, too, if you want."

Joyce did not answer at first. As he looked down at her, Alan was struck by the sense of how young and innocent a girl Joyce was, and with bitter self-reproach he remembered those long months of the winter past when he had left her alone to her battle, because Elizabeth, protected, sheltered, kept in ease at Edmonton, had demanded it of him. He realized that in her desperate plight she needed his strength and protection far more than Elizabeth had needed his. He thought of her in the world, without friends, relatives, money, and with her father in the shadow of the gallows.

Presently, with the spirited courage he had always loved in her, Joyce asserted: "Alan, I'm going back home. The Degribes are bringing in their turn next week. I'll send several of them on down to the Hares and MacMillan and get their furs, too. I'll sacrifice all our trade goods and raise money for Dad's freedom. I'll be a true way of fighting for Dad if I go back home. I don't mind the cold."

## HELP FOR TIED WIVES

Take Lydia E. Pinkham's  
Vegetable Compound

Wives get tied during these hard times. The husband is the head of the household of the family. When the husband is gone, the wife is left with a heavy burden. It is the wife's duty to keep the household running. If you are tired, worn out, or feel that you are not getting on, take Lydia E. Pinkham's Vegetable Compound. It will help you to get on your feet. It will help you to get on your feet. It will help you to get on your feet.

I can take care of myself. I'll be lonesome, but all the time I'll be knowing that I'm doing the right thing and being a real help to you. Alan acquiesced reluctantly, against his better judgment. A slender girl he knew, scarcely out of her teens, going back to that isolated post. A white girl, winsome, pretty, of lithe-some body, alone there, with Indians coming and going, with half-breeds coming and going...

Joyce asked him: "What happened between you and Haskell, Alan?" Briefly Alan told her what had taken place down there in the cabin. His account left Joyce speechless in a silent fury, her little fists clenched, her lips parted in astonishment. "But he can't demote you, Alan!" she cried. "He can't blame you for his mistake."

"He can't? He's already done it! If I try to fight him, if I make the slightest inordinate move, he's actually got the power to jail me!" "But the Incomum patrol—he'll let you go on that, Alan?"

(To Be Continued.)

## Panama Hats

Skittled Weavers Fashion Headgear

From Leaves of Palm Tree to Panama hats, which have earned a deserved celebrity under the name, are rarely manufactured in Panama, but are made in the neighboring state of South America. The origin of the hat came from Ecuador, which is still the chief source of production. The name originated during the gold rush to California in 1848. Prospectors purchased these straw hats in Panama and are naturally called Panama hats. Hats made from toquilla straw are now made in Colombia, Peru and in Central America, and all of them are indiscriminately known as Panama hats.

Few male tourists leave the Canal Zone without one or more of these hats. Shops make a specialty of catering to the winter visitor. Considerable business in this line is expected to be produced by the six "Masterton" ships, which are to sail from the new leaves, which are cut off just as they are about to undergo their split with needles or the finger.

In Ecuador the hats are made in the Province of Manabí, where they are known as "light-jappes." Here the hat is also made from a fan-shaped palm which grows from six to ten feet high and the trunk is straight and humid region. After the leaves are cut from the trunk they are stripped of their outer filament, dipped for a few seconds in water, withdrawn for a moment to be again immersed for an instant, taken out and shaken vigorously, and then dried in the shade for a day or two later are placed out in the sun to bleach. A little lemon juice added to the hot water bath gives a much whiter straw in a day or two.

It was formerly believed that Panama hats were woven under water, which is not strictly true, although the straw must be kept thoroughly moistened while in the hands of the weaver. Women and children make the most skillful weavers, although men sometimes possess adequate enough to be successful in the art. It takes from one day to a week to weave a hat, according to its size.

Although ordinary Panamas sell for two dollars, one made some years ago as a present to the King of England was so finely woven that it could be folded into a package no larger than a man's watch. It required six months to make this hat. It contained the finest straw and the work on it was done only during certain hours of the morning and evening, when the amount of moisture in the air was just right.

More Fish Licenses During 1931 fish production showed a decrease for every Canadian province except Saskatchewan and the Yukon. On December 20, 1932, there had been an increase of domestic fishing licenses to the extent of 348 over the corresponding period of the previous year. This is an indication that the residents of the province are making greater use than hitherto of the fish of our own waters.

Pinapples are about 87 per cent.

## Get Rid of That SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Cough some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's a cold with the sore throat, so take two tablets to throw off back to that isolated post or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

## Vagabond Crow Angers Vancouver Housewives

Once Civilized Bird Is On Back To  
Nature Rampage

"Lock the windows and bolt the doors!" is the cry of Vancouver housewives when "Impudent Oscar" recalcitrant crow, makes a devastating sally upon carefully guarded foodstuffs and valuables.

Oscar, once "civilized," is on a "back-to-nature" rampage. No one carries on "Oscars" began his somewhat humorous raids upon sidewalk groceries, taking peanuts, grapes, pretzels, and ruining picnics. But housewives became indignant, when he made off with part of the family wash of several lines.

His forays were more serious still when he nearly took off with several sheets of an important file through a courthouse window. When he dived into the hayrack of Mrs. Guy Bennett and ruthlessly attempted to bully a tiny bantam chick, it was the last straw. Since then he has been a fugitive.

Passengers Were Lucky

Pilot Made Perfect Landing On Ice  
With One Ski

Piloting his heavy plane with marvellous skill and daring, Ronald George made an almost perfect landing on one ski on the ice of Chapleau Lake at Chapleau, Ontario. And not until the big plane had bumped to a stop did his seven passengers realize how closely they had come to death.

George took off with a party of military notables for a trip to the Kewy Gold Mines property at Chapleau Lake. A ski struck a piece of crooked hidden in the snow and broke just as the machine lifted.

With his ear and hand cut by flying glass, George said nothing to his passengers, but appeared to be continuing on his way. Actually, however, he circled over the town, signalling them to stand by for a forced landing.

# National Radium Commission Chairman Draws Attention To Dangerous Nature Of Substance

Radium, the rarest and costliest of minerals, commonly regarded as a valuable servant of surgery in the fight against cancer, can be the most lethal and dangerous of poisons in the hands of the unscrupulous and the ignorant.

In making this statement to a conference of experts, Viscount Lee of Fareham, chairman of the national radium commission, drew a startling picture of the potentialities for evil if the substance were put to a criminal use, says a London newspaper.

"A tiny flask containing one gramme," he declared, "would be sufficient to murder your neighbor sleeping on the other side of the wall of a semi-detached house, without arousing suspicion in the minds of his family or the police."

Urging strict government control of radium, Lord Lee gave alarming examples of the terrible effects of certain patent remedies and cosmetics containing radio-active substances, some of which, he stated, would be deadly if used in the form of a salve or ointment.

Lord Lee's pronouncement was made while delivering the Sir David Thompson lecture to the conference of the British Institute of Radiology at Central Hall, Westminster.

There was no doubt as to the curative value of radium, he declared, there was none about its palliative effect and its power to relieve pain. On that ground it could claim to be of benefit to mankind, its greatest foes were ignorance and overconfidence.

It was the conviction of the national radium commission that radium is far too dangerous a substance to be let loose upon mankind. It is the most lethal and dangerous of poisons. It should be prohibited from importation or sale, except under special license.

Under existing conditions the extreme costliness of radium was perhaps the public's best safeguard. At £15,000 a gramme there was not much risk of its becoming a "cheap" example of the perils of carelessness in the use of radium. Lord Lee described the case of the woman who gave birth to a child with luminous watch dials with a preparation containing minute quantities of radium or mesothorium, pointed the brushes at intervals with their tongues.

In many cases the consequences did not become apparent until more than four years after the girls had left their employment.

"How many girls perished as a result of this careless use of radium is not accurately known," added Lord Lee, "but 18 have certainly died and some 30 more are regarded as doomed."

Referring to patent remedies, cosmetic preparations and the like, containing or professing to contain radium or radio-active substances, Lord Lee stated that in some cases these were harmless. They were merely fraudulent because they contained no radium at all, or only a negligible trace.

On the other hand some commercial preparations containing radium were so potentially deadly that their preparation or sale should be strictly suppressed by law and even made a criminal offence.

"I refer particularly," Lord Lee went on, "to the so-called 'radium waters.' This deadly beverage really contains an appreciable amount of radium, and its first effect is usually doubly agreeable and stimulating."

"So much so that one of its prominent victims, a Pittsburgh iron-master and an amateur golf champion, not only drank large quantities himself, because it seemed to 'improve his game,' but being wealthy and generous he sent cases of it as gifts to his sporting friends. What became of them I do not know, but he himself died recently from neurosis of the jaw, acute anaemia and absence of the brain."

"The autopsy revealed the largest amount of radium ever found in a human body—some thirty micrograms, enough to kill three men or women."

"This was perhaps an extreme case, but a credible public in this country is being dosed with advertisements of quick 'radium remedies.'"

"None of these, in my informed, can save the slightest, temporary value, and to such extent, if any, as they

contain radium they must be harmful and potentially dangerous.

"In my view the preparation or sale of radio-active preparations designed for either internal or external use should be absolutely prohibited."

## A New Narcotic

Believed To Be More Effective Than Morphine, and Non-Habit Forming

Medical science is expected to announce soon the perfection of a narcotic derivative said to be more effective in relieving pain than morphine or heroin. This sedative, diastilid, is now being studied in the United States Public Health Service and leading clinics throughout the nation.

German and Swiss scientists already have made remarkable claims for diastilid. Several high-ranking German doctors assert that diastilid is not habit-forming.

Recent experiments at the Mayo Brothers clinic are understood to have shown that diastilid is especially valuable in obstetrical, cancer and intestinal treatments.

A report received by Harry J. Angell, Commissioner of the Federal Bureau of Narcotics, from the Mayo clinic stated that "diastilid in one-sixth the dose of morphine proved so effective."

Diastilid is a cousin of heroin. Chemically it is di-hydroheroin hydrochloride.

By Ruth Rogers

Under existing conditions the extreme costliness of radium was perhaps the public's best safeguard. At £15,000 a gramme there was not much risk of its becoming a "cheap" example of the perils of carelessness in the use of radium. Lord Lee described the case of the woman who gave birth to a child with luminous watch dials with a preparation containing minute quantities of radium or mesothorium, pointed the brushes at intervals with their tongues.

In many cases the consequences did not become apparent until more than four years after the girls had left their employment.

"How many girls perished as a result of this careless use of radium is not accurately known," added Lord Lee, "but 18 have certainly died and some 30 more are regarded as doomed."

Referring to patent remedies, cosmetic preparations and the like, containing or professing to contain radium or radio-active substances, Lord Lee stated that in some cases these were harmless. They were merely fraudulent because they contained no radium at all, or only a negligible trace.

On the other hand some commercial preparations containing radium were so potentially deadly that their preparation or sale should be strictly suppressed by law and even made a criminal offence.

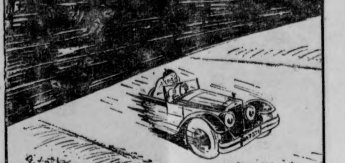

"I refer particularly," Lord Lee went on, "to the so-called 'radium waters.' This deadly beverage really contains an appreciable amount of radium, and its first effect is usually doubly agreeable and stimulating."

"So much so that one of its prominent victims, a Pittsburgh iron-master and an amateur golf champion, not only drank large quantities himself, because it seemed to 'improve his game,' but being wealthy and generous he sent cases of it as gifts to his sporting friends. What became of them I do not know, but he himself died recently from neurosis of the jaw, acute anaemia and absence of the brain."

"The autopsy revealed the largest amount of radium ever found in a human body—some thirty micrograms, enough to kill three men or women."

"This was perhaps an extreme case, but a credible public in this country is being dosed with advertisements of quick 'radium remedies.'"

"None of these, in my informed, can save the slightest, temporary value, and to such extent, if any, as they

"Heaven! What a noise the old bus is making!"—Der Lustige Sachse.

## Island Less Productive

Native Of Tristan Da Cunha Cannot Even Grow Potatoes

Britain's most lonely outpost, the Island of Tristan da Cunha, in the South Atlantic Ocean, refuses now to yield to its 162 inhabitants even potatoes. The barren island used to produce potatoes, but, according to Rev. A. G. Partridge, missionary and former governor of the island, who returned to London, the production of potatoes has almost ceased.

Mr. Partridge was recently on furlough from the island but returned somewhat hurriedly under the authority of the British Government with the status of governor because a Brazilian scientific expedition was expected to visit the island. The expedition was abandoned, however, but in the meantime Mr. Partridge officially appointed one inhabitant as chief of the island.

Mr. Partridge was given a busy time when a Japanese war ship called at the island. He married three couples, christened a baby, packed his kit and sailed away with the ship within three hours of its arrival. It will be at least a year before another ship calls and it is learned how the first native governor is conducting his duties.

While Mr. Partridge was on the island the new chief ordered the latest woman on the island to stand on stocks constructed of a soap box.

## Could Take Her Choice

But Admirer Of Famous Pianist Was Too Discerning

Paderewski has, like many another notability, undergone the ordeal of competing with autograph hunters' demands for signatures. But the famous pianist, if we may judge by what is said to have happened on one occasion, drives the line at the distribution of mementoes in the shape of samples of his beautiful hair, albeit gifted by nature with a profusion of that article.

It was when he was visiting America that a well-known society woman had the audacity to hand through the window of his private car a gushing epistle, winning up with a request for "a lock of hair." It is alleged that Paderewski's secretary replied as follows: "You fail to specify whose hair you desire. M. Paderewski, therefore, in order to avoid disappointment has secured for you some fine specimens from his manager, secretary, valet, waiter, two cooks, and the cat."

## BRITISH HOSPITAL GETS PRECIOUS RADIUM

Lord Leconfield, Lord Lieutenant of Sussex, England (left), presents to the Royal West Sussex Hospital, Chichester, 70 milligrams of radium, on behalf of the British Empire Cancer Campaign. The value of the radium is approximately \$4,000. The gentleman receiving the gift is the Mayor of Chichester.

# Lady Member Of French Secret Service Had Record Of Notable Accomplishments During War

## Over Hundred Trains Daily

Electric Service Between London and Brighton Cost £2,750,000

The new electrified service from London to Brighton, Hove, Slough, and Worthing—six trains an hour each way and refreshments all the time was opened on a recent morning by the Lord Mayor of London, Sir Percy Greenwood.

He and his party, accompanied by newspapermen, left Victoria station at 11:12 and reached Worthing in an hour and 12 minutes, where they were greeted by T. E. Hawkins.

At Brighton a few minutes later Mayor Frank G. Best and council entertained the party to luncheon. This took place in the banquet hall of the new strange exotic structure in Brighton which was a royal palace more than a century ago.

One hundred years ago the first steam coach arrived in Brighton by road from London. Those passengers, too, had luncheon. They needed it. The journey had taken them seven hours.

Then there was the one famous Red Rover coach that broke all speed records with horses on the Brighton road with a time of 4 hours 24 minutes.

Someone else had an idea of taking passengers to Brighton on a motor-bus. It was tried by sails but gave it up. On September 20, 1841, the first steam train arrived in Brighton on rails.

The electric service now inaugurated has cost about £2,750,000. On week days it will provide 101 trains and 35,120 seats daily between Brighton and London. An increase of at least 1,000 passengers a week over existing traffic is expected.

## Has Peculiar Hobby

English Aristocrat Allows Spiders the Run Of His House

The Marquis of Tavistock, only son of the Duke of Bedford has a new hobby—spiders. The marquess, who is a well-known sportsman, not only studies the spiders but breeds and feeds them and even allows them the run of his house at Penshurst, Sussex.

Mrs. Muffet need be frightened no longer, the marquess says, for as far as he can ascertain all the alarming propensities attributed to spiders are mythical. They possess considerable intelligence and the males are past masters in fact when it comes to dealing with their women folk, he says.

For instance, if Mrs. Spider is annoyed her husband will soothe her by pulling and shaking the web—a proceeding which she seems to like.

## Another New Word

Governor Pollard Of Virginia Tells What "Comatary" Is

The word normally came out of the war of the word technology out of the depression and now comes the word comatary out of vacation.

Governor Pollard of Virginia coined the word which, he says, is the compilation of "definition not found in dictionaries, collected from the sayings of the wise and otherwise."

"Depression—a period of time in which we have to do without what our parents never had."

"Comatary—one who can disagree without being disagreeable."

The governor has written a comatary which he gave 100 copies of to his friends.

## An Afterthought

A neighbor called on the Meektons. After a short talk he rose from his chair.

"Well, well," he said, "I suppose I must be going. I'm on my way to the club."

Meekton rose, too.

"I think I'll go, too," he said.

"Why don't you stay at the corner of her eyes."

"Bed!" finished Meekton miserably.

## Did Not Need Finding

Bobby did not seem to be paying much attention to the lesson, so his teacher thought he would question him, just to see if he had been listening.

"Now, Bobby Jones," she cried.

"Where are elephants found?"

"Well, miss," said Bobby, "they are so big they aren't very often lost!"

She looked like a British. But her name had a sound as British as afternoon tea. Over Paris the her Thomas Crompton. There was said to be a "Mrs. Crompton" who was sitting among the crowd as the dignitaries stepped up to pin upon her the red ribbon of the Legion of Honour. Then came a cry of "Hoorah for France!" a sweeping back of fifteen years and war slogans once more leaped in the air.

Then there were whispers that "The Skyline," for this quiet looking woman reviving the pledge of action of her country was Mme. Richard, one of the foremost members of the French Secret Service, with a record of notable accomplishments during the War years.

Marthe Richard was an aviator, and that was the service she sought eagerly to join. But the French authorities would not hear of it. So she joined the French Secret Service and was sent to Spain. Mme. Richard had had many previous experiences, but she had her own wit to point the way for her. It was a brilliant path. First in it was Baron von Kolberg, who was in charge of German naval intelligence in the Iberian Peninsula. Mme. Richard explained to him that the French spy, he showed him to think that she would sell out to the Germans. So for fifteen months she led the Baron along, apparently serving him, but in fact she was managing to tell Paris, however, of the German invisible ink, sending along a sample and of the numbers and location of German ships in France.

Communicating with Spain, she sent along, also samples of highly explosive toys with which it was the pleasure of Mme. Richard to blow up French munition plants. Finally, she told the Allies of German's intention to reopen unrestricted submarine warfare and the fact of 200 submarines which they had at their disposal.

It must have been a shock to Baron von Kolberg, when one afternoon after she had rid his name—she cheerfully informed him that she was about to sleep out. Such a thought as delay to him had never entered his mind.

The Baron was later tried for negligent neglect of duty. But no one knew the feminine name until she was cited for decorations.

It seems altogether too bad that there should be an edict against secret service memories. Mme. Richard's, that is Mrs. Thomas Crompton's, would make good reading.—Winnipeg Free Press.

## Greenland Route Best

Terned Safest Way By Air From America To Europe

Fast air travel between America and Europe over a safe route and on regular schedules was the program held out to an audience in Convocation Hall, Toronto, by one whose pioneer investigations have done much to make such an airway possible. The speaker was Dr. W. H. Hobbs, geologist and explorer of the University of Michigan, who delivered the weekly Royal Canadian Institute lecture, telling what recent expeditions have learned about Greenland. The best air route will use Labrador, Greenland and Iceland as intermediate points, Dr. Hobbs stated.

"The longest water jump involved is 600 miles," he said. "This course also promises the greatest freedom from fog, offers winds over Greenland which can always be favorable, and is the closest to great circle sailing of all projected courses."

## Winter Is Less Severe

U.S. Weather Charts Show Spring Is Closer Behind

Charts covering a period of 113 years asked an answer to the old query: If winter comes, can spring be far behind?

Spring, the United States weather bureau decided after long study of the charts, is not so far behind winter as it used to be—but there is no telling about the future.

J. B. Kincer, chief of the climatological section of the bureau finds that the most severe winters during the last century occurred about the time of the civil war, that since winters have been a little shorter and less intense.

Shoes are being given for cigarettes coupons in England.

Normally about 1,500,000 persons are employed by railroads.

Jockey caps are becoming fashionable for women in London.

## FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen-try it now at our expense. We have distributed a great many of our "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 72c package. This consists of one regular 72c bottle together with a special trial bottle, just put in the new package. It is trial bottle first, but it is a real bottle. It will give you the same results as the regular bottle as well as good as new. "Ask it back." Your druggist is authorized to return your old bottle, empty and without payment. What could be fairer? Manufactured by Dr. Kruschen Brothers, Ltd., Montreal, Quebec, Canada. Importers: McEwen's Pharmacy, 1001-1003, 1005-1007, 1009-1011, 1013-1015, 1017-1019, 1021-1023, 1025-1027, 1029-1031, 1033-1035, 1037-1039, 1041-1043, 1045-1047, 1049-1051, 1053-1055, 1057-1059, ## Here and There

"The decrease in freight car loadings which began in 1929 has continued almost unabated. In 1931 car loadings were 10.7 per cent below 1929, and in the first week of December, 1932, less freight cars had been loaded on Canadian Railways than for the same period of the previous year. During the same period of this year 1932, 10.7 per cent less freight cars had been loaded than in 1931. The decline in passenger business has been relatively the same. The realization of deficit upon railway earnings has been the first ten months of 1933 Canadian Pacific gross revenue declined 22.1 per cent, as compared with that of 1932. For the first ten months of this year now closing there was a further decline of 15.4 per cent. The decline continues and there certainly appears to be no evidence in sight that for many years we shall see them entirely eliminated and our earnings back where they were in 1928."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1932.

In the vanguard of the winter vacation traffic to the South Seas and the Orient, the Canadian Pacific liner "Empress of Japan" cleared the Narrows at Vancouver January 14 with a list of 411 passengers.

Recent payment by Great Britain of \$95,550,000 war debt installment, reminds old-timers of the war days when Britannia in gold was shipped by Canadian Pacific Express from Asia to England via Canada, and was carried across the Dominion on a special Canadian Pacific train, having also a full right-of-way. The train travelled without a hitch and was protected by scores of armed guards.

## EYES EXAMINED

at the Hotel Oyen, Friday afternoon, February 24. E. J. Anderson B.Sc. in attendance.

Auction Sale—Under instructions from Mr. F. W. Moore, I will offer for sale at public auction, on Tuesday, March 14, 1933, Stock, Machinery and Household Goods, on Section 5, Township 29, Range 3, (7 miles north and 3 miles east of Oyen). Sale to commence promptly at 12 noon. Lunch will be served.

Mr. Geo. A. Morrison, Mr. S. A. Miller, Mr. Allan Campbell and Mr. Stan. Thayer attended the Drumheller 'spiel as glass and returned with some rinks as a result of their prowess.

Mr. M. G. Whitlock returned to Oyen last week-end after spending a week in Saskatoon visiting his family and playing in the city bonspiel.

Miss Lillian Reinhold spent the week-end in Saskatoon.

Mr. and Mrs. A. J. Funnell and family were week-end visitors in town from Carleton Place.

Miss Elizabeth Johnson who came to Oyen to attend the funeral of her brother, Mr. A. E. Johnson, returned to Cranbrook, B. C. last Tuesday.

Mr. W. F. Pratt was an Oyen visitor the fore part of this week from Hanna.

How do you do C.G.I.T. group?  
How do you do?  
How do you do?  
I did not see your show  
But I hear you made it go  
Good for you, C.G.I.T. group  
Good for you!

## Excel Items

The Excel ladies Aid met at the home of Mrs. E. L. Gullekson, on February 1. The cold weather kept many members from attending. Two visitors from Oyen were present. Mrs. E. Church occupied the chair. The usual routine business was followed, after which Mrs. S. B. Gullekson and Mrs. C. E. Gullekson sang a duet which was much appreciated. It was decided to purchase material for making useful articles for sale later on. All members are requested to do some work. The next meeting will be at the home of Mrs. S. B. Gullekson, on March 2. A special programme being arranged. The roll call will be answered by a verse from a favorite hymn by "Sankey".

Two rinks from Excel were Youngstown visitors Monday evening and were successful in their quest to lift the Beaver Cup. Frank Thayer, skipping a rink composed of Stan. Thayer, Paul Grouse and Vincent Seymour played McLeod a 12 end draw, while the "Bishop Boys" Floyd, Clint, Rob and Duane piled up 18 to Norman Steele's 3 (1 ends). (How come, Norman).

On Saturday afternoon last, the boys' rink which cleaned up the Alsaak bonspiel, were visitors at the Excel rink. They played two games and won each by a small margin. The personnel of the visiting rinks, was: Sam Grayson, sk., Ken. Whitley, Allan Jones and Glen Shantz.

During the intense cold spell, the ice developed a few cracks and preparations are being made to re-flood.

The U.F.W.A. card party held at the home of Mr. and Mrs. R. E. Bishop was a success.

At the annual meeting of the ratepayers of the Village of Oyen, held on Friday, February 3, Mr. J. J. Kelly, retiring councillor, was re-elected to office by acclamation.

The meeting of the electors of the Municipal District of Cereal No. 242 will be held in the Community hall, Lundre, on Saturday, February 18, at one o'clock. Nominations of candidates for the office of Councillor, will be received from 3 p.m. till 4 p.m.

At the annual meeting of ratepayers of Oyen School District, Mr. C. G. Peterson was elected the board of trustees in place of Mr. Harvey Johnson, and Mr. J. P. Roraback, retiring member of the board, was re-elected to office. The election of the two officers was by acclamation. Mr. C. S. Wright is the other member of the board.

Mr. E. R. Southcott, formerly of the bank staff here, but now on the Calgary staff, arrived in Oyen this morning to spend a week visiting friends.

Miss Jane Morrell left this morning for Lacrosse, Sask.

Mrs. C. P. Snyder and son Jack left last Thursday for Stettler where they will make their home.

## Impressive Service for Arthur E. Johnson is Widely Attended

(Continued from page 1.)

T. F. and Mrs. Holt; Mr. V. E. French and staff, Bank of Toronto; Mr. and Mrs. M. J. Raddatz; Mr. and Mrs. R. A. McLaren; Mr. and Mrs. J. R. Acheson; Mr. and Mrs. George Morrison; Dr. and Mrs. D. L. Dick; Mr. and Mrs. G. S. Peck; Mr. and Mrs. Thos. Lees; Mr. and Mrs. H. J. Cooper; Mr. and Mrs. J. Shields; Mr. E. L. Clough and Dr. and Mrs. J. P. Kerr. The following friends acted as pallbearers: Mr. Louis Gillespie, Mr. Clifford Cates, Mr. Ted Nance, Mr. A. O. MacArthur, Mr. George Langmuir and Mr. S. A. Miller.

The late Arthur Elmer Johnson, who was born in Kenosha, Wisconsin, November 11, 1905, was predeceased by his mother and infant sister. He came to Oyen in the fall of 1916 as a teen age boy and grew to manhood here shortly after the fire which destroyed the Peterson Motor Co.'s premises in December 1922, he was made manager of his father's business, which was re-established under the name of "Johnson's Garage" and continued as a partner in the firm till the time of his death. He was Oyen's youngest business executive. He was married to Maude Elizabeth Morrell, on January 1, 1925. He is survived by his widow and five children, Dorothy, Beatrice, Vernon, Wayne and an infant son; by his father, Mr. C. V. Johnson of Hanna, two brothers, Harry of Cereal and Clarence of Kennedy, Minn., and three sisters, Mrs. A. V. Brodine of Chinook, Elizabeth of Cranbrook, B.C., and Elora. Funeral arrangements were by J. A. Waterhouse, Cereal.

## District Shivers as Sub-Zero Weather Grips West

Since Sunday, February 4, the district has been shivering in the coldest weather experienced this winter. The lowest temperatures were registered over Tuesday night and Wednesday morning (February 7-8) when the thermometer readings were between 25 and 30 below. For over twenty-four hours a stiff north west wind added to the general discomfort. On Thursday afternoon and evening the weather moderated, 15 degrees above being reached during the evening; but the respite was short. On Friday sub-zero temperatures were recorded all day, with 25 below as the lowest. Saturday the readings were 27 below for the low point and 4 below for the high. Sunday the range was 12 below to 1 below. On Monday (Feb. 13) at noon 6 above zero was recorded, but by night the temperature was down to 17 below. Yesterday 11 below and 15 below was max. Today the weather is more moderate, 17 above being recorded at 8 a.m.

Rev. F. F. Kemp left Tuesday morning for Drumheller to attend a two-day meeting of the Drumheller Presbytery. Mr. R. J. Scott, Oyen lay delegate to Presbytery, left on Tuesday afternoon by car, accompanied by Mr. R. E. Gillespie, Mr. J. R. Acheson and Mr. H. Austen.

Two rinks left Oyen yesterday to take part in the Hanna bonspiel; One rink skipped by Thos. Lees, includes E. D. Thygesen, Art Wade and A. O. MacArthur, and the personnel of the other rink is Jim Marshall, Dr. D. L. Dick and Floyd and Clint Bishop.
